NICOTRA|Gebhardt
fan|tastic solutions

Nicotra Gebhardt – a strong partner

With more than 50 years of experience manufacturing fans, more than 1000 employees, and the most extensive product line on the market, we are among the most significant manufacturers of centrifugal fans.

Production facilities, subsidiaries, and representatives around the world are a prerequisite for close partnerships and guarantee proximity to customers.

Our own intensive research and development organisation, modern production, short response times, and fast and competent service have always been the important pillars of our success.

Use of process air fans

Process air fans are an important component of machines and plants. In these applications they assure functions that would not be possible without defined air movement. Of these specially developed, robust fans, there are several standard ranges and a number of customer-specific solutions.

Examples of ventilation technology processes

- ▶ Cooling *of generators...*
- ▶ Drying *agricultural products...*
- ▶ Ventilating *composting plants ...*
- ▶ Extracting *contaminated air from paint systems...*
- ▶ Circulating *hot air in industrial furnaces...*

Competent, fast, flexible

For more than 15 years we have been successfully active in the field of process air technology.

Specialists brought together in a separate business unit stand for competence, speed, and flexibility.

For example, as a partner for machine and plant engineering, with our fan solutions we are successful in the following industries:

- ▶ Printing and paper technology
- ▶ Dedusting engineering
- ▶ Rubber and plastic machines
- ▶ Industrial furnace construction
- ▶ Compressors
- ▶ Machine motors, steam boilers, and firing systems
- ▶ Locomotives and rail cars
- ▶ Machines for the food industry
- ▶ Surface technology
- ▶ Cleaning machines
- ▶ Special machine engineering
- ▶ Textile machines
- ▶ Drying technology
- ▶ Wind turbines

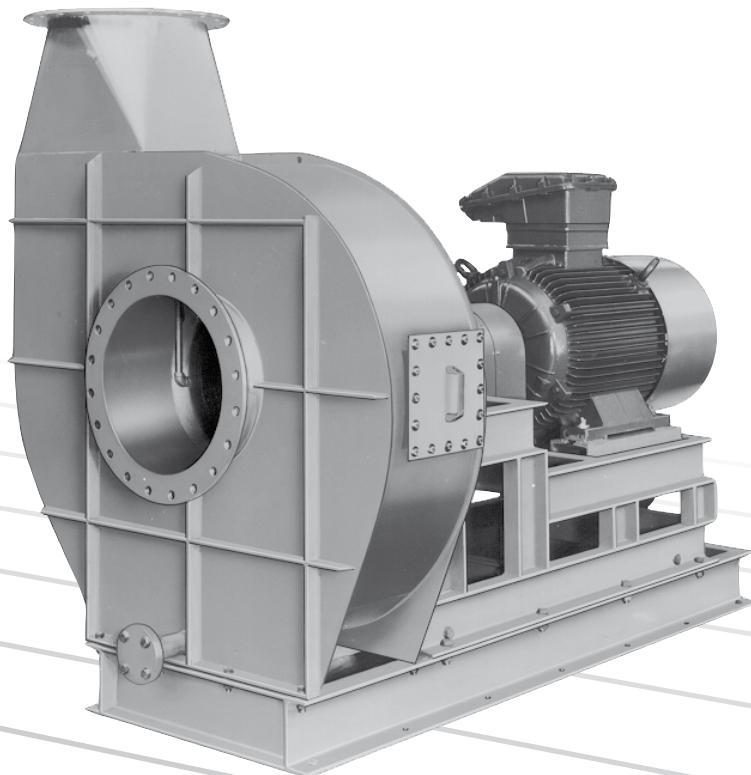

Solutions tailored to your requirements

Our products stand for the highest level of quality and reliability. The standard solutions can be easily configured with our electronic proSELECTA II selection program. You get complete documentation with data, dimensions, and prices. Moreover we can offer cost effective, modifications tailored to your needs.

Our customers value the solution competence of our technicians. Our technicians support you in selecting the suitable fans and with engineering with the objective of ensuring optimal function, long service life, and low maintenance requirements at minimum costs. In this regard the level of consulting competence extends far beyond the usual level and also includes areas such as...

- ▶ The technical flow integration of the fan in the machine
- ▶ Minimisation of noise emission
- ▶ Minimum energy consumption
- ▶ Vibration considerations
- ▶ Solutions where installation space is at a premium

Customer-specific process air fans

In addition to the broad line of standardised centrifugal fans for ventilation and air-conditioning technology and process air technology, as well as the many variants that can be generated with our product line, Nicotra Gebhardt also has years of experience in the area of customer-specific fan solutions. If the requirement is appropriate even totally new developments are possible.

This brochure is designed to provide you with an overview of the process air fan product line, enable you to make pre-selections, and to supply an initial basis for planning. To precisely present all possibilities, technical details, and combinations would exceed the scope of this brochure.

With our proSELECTA II selection program, available at www.nicotra-gebhardt.com you can configure your fans on your own. Call us now to release access to this program. Naturally we can also configure fans for you.

The program

- Robust industrial versions
- Long service life, easy to maintain
- High efficiency, quiet operation
- Custom solutions at series production prices
- Quality is certified and assured in accordance with ISO 9001
- Technical data measured as specified in DIN 24163
- Tolerance class 2 in accordance with DIN 24166
- 3D drawings for planning

P2M

Industrial Process Fans
with housing and direct drive

Spiral housing

Robust welded construction, Housing positions in 90° increments, Individual install position, Different levels of tightness, Suction-side connection DIN 24154-R4, Pressure-side connection DIN 24158-R4

Centrifugal impeller

Impeller diameter 280 to 900 mm, Backward-curved blades, Welded, Dust-repellent

Motor

Standard motor, B5 mounting, Maximum motor size 200

Materials

Coated steel, Hot-dip galvanised, Stainless steel 1.4307, Stainless steel 1.4571 on request

Medium

Media temperatures from -20 °C up to +300 °C

ATEX

Category 2 and 3; gas and dust

Extensive range of accessories

P4M / P4K

Industrial Process Fans
with housing and direct drive

Spiral housing

Robust welded construction, Housing positions in 45° increments, Different levels of tightness, Suction-side connection DIN 24154-R4, Pressure-side connection DIN 24158-R4

Centrifugal impeller

Impeller diameter 1000 to 1600 mm, Backward-curved blades, Welded Dust-repellent

Motor

Standard motor, B3 mounting, Maximum motor size 315 (type P4K:
For motor size 280 and 315 also with coupling between motor and impeller)

Materials

Coated steel, Hot-dip galvanised, Stainless steel 1.4307, Stainless steel 1.4571 on request

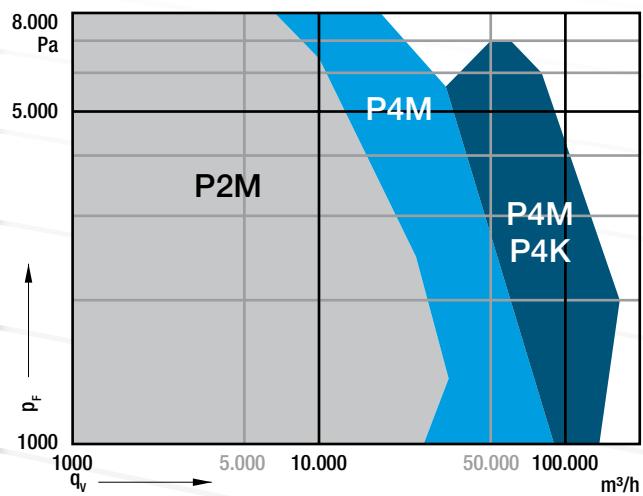

Medium

Media temperatures from -20 °C up to +300 °C

ATEX

Category 2 and 3; gas and dust

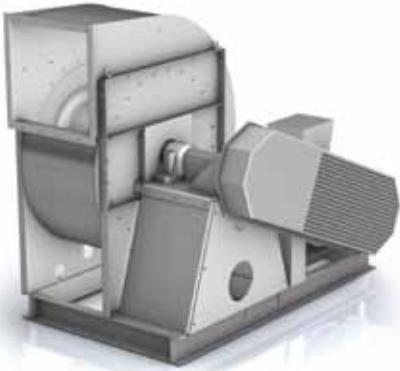

Extensive range of accessories

Pre-selection, dimensions and accessories for P2M, P4M, and P4K, see page 6 to 9 ...

P4R

Industrial Process Fans
with housing and belt drive

Spiral housing

Robust welded construction, Housing positions in 45° increments, Different levels of tightness, Suction-side connection in accordance with DIN 24154-R4, Pressure-side connection in accordance with DIN 24158-R4, Compact subconstruction with bearing block, bearing, base frame and motor clamp fixture

Centrifugal impeller

Diameter 450 to 1600 mm, Backward-curved blades, Welded, Dust-repellent

Motor

Standard motor, B3 mounting, Maximum motor size 315

Materials

Coated steel, Hot-dip galvanised

Stainless steel 1.4307, Stainless steel 1.4571 on request

Medium

Media temperatures from -20 °C up to +300 °C

ATEX

Category 2 and 3; gas and dust

Extensive range of accessories

Q2M

Industrial Process Fans
without housing and direct drive

Built-in system

Flat mounting plate, Mounting frame, *thermolock50* Insulation, Inlet cone loose or attached

Centrifugal impeller

Diameter 280 to 1,400 mm, Backward-curved blades, Welded, Dust-repellent

Motor

Standard motor, B5 mounting to size 180, Standard motor, B3 mounting from size 200, Maximum motor size 315

Materials

Coated steel, Hot-dip galvanised,

Stainless steel 1.4307, Stainless steel 1.4571 on request

Medium

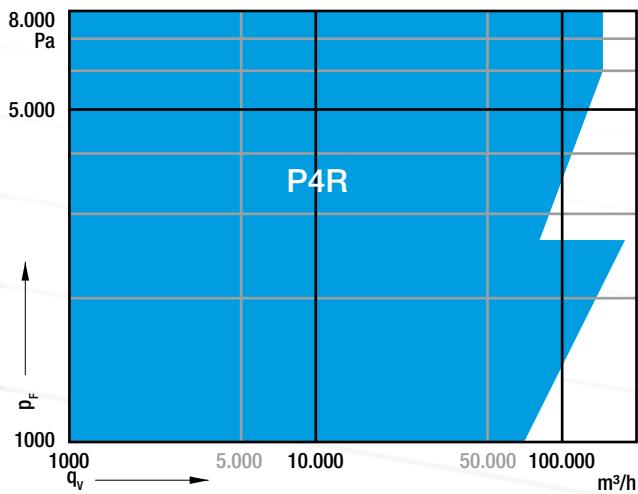

Media temperatures from -20 °C up to +500 °C,

Highly efficient thermal insulation *thermolock50*

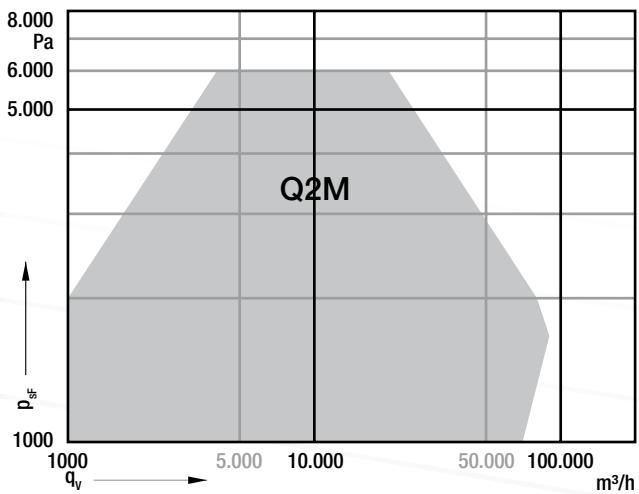

ATEX

prepared for Category 2 and 3; gas and dust

Extensive range of accessories

Pre-selection, dimensions and accessories, see page 10 to 13 ...

Pre-selection, dimensions and accessories, see page 14 to 17 ...

= P4M/P4K

How to quickly get the desired result.

For example:

~90,000 m³/h and ~5,600 Pa.In the Pre-Selection you will find:

Type designation: P4M-T3B44

Dimensions see page 8

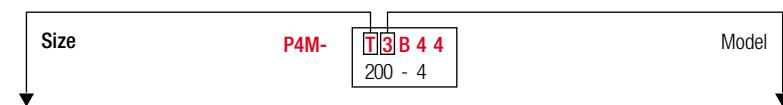

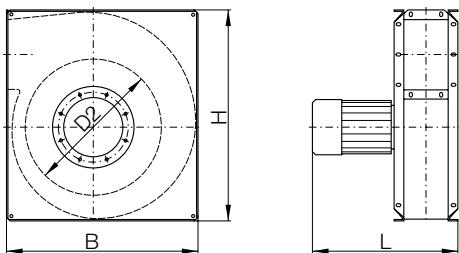

P2M / P4M / P4K

Industrial Process Fans

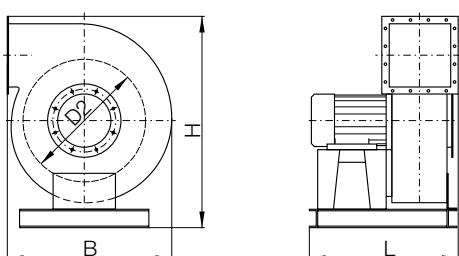

with housing and direct drive

Main Dimensions in mm, subject to change.

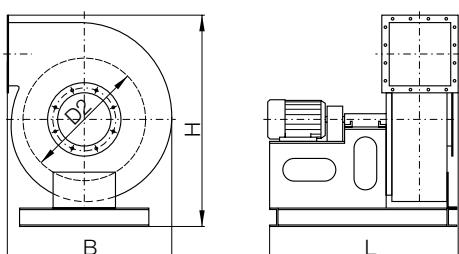

The dimensions can be determined from the Pre-Selection, as follows:

**P2M**

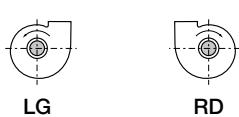

Size P2M-	Impeller $\varnothing D_2$	B	H	L_{max} for model							
				1	2	3	5	6	7	8	
D	282	412	446	630	—	590	—	500	—	—	
F	355	511	557	790	—	730	—	620	—	—	
H	447	634	697	960	—	890	—	750	—	680	
J	501	710	777	1010	—	930	—	770	—	—

Housing Position and Rotation**Direction of rotation**

The direction of rotation is determined with viewing direction toward the drive side (motor):

LG = anticlockwise.

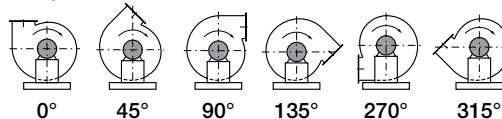

RD = clockwise.

LG and RD are available.

P2M**Housing positions**

The housing positions of the P2M are possible in 90° increments for the following positions:

0°, 90°, 180° and 270° (see Fig.)

P4M / P4K

The housing positions of the P4M and P4K are possible in 45° increments for the following positions:

0°, 45°, 90°, 135°, 270° and 315° (see Fig.)

Housing positions 180° and 225° on request.

P4R

Industrial Process Fans

with housing and belt drive

How to quickly get the desired result.

For example:

~100.000 m³/h and ~1.000 Pa.
In the Pre-Selection you will find:

app. shaft power in kW	Nominal size Intake
---------------------------	------------------------

Type designation: P4R-U1B-1400

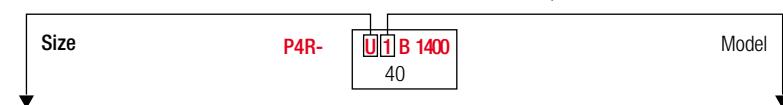

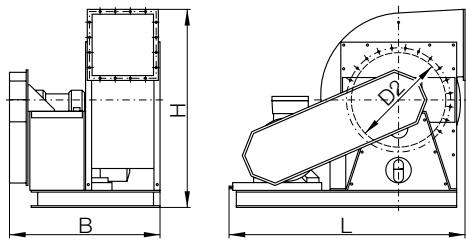

Dimensions see page 12

P4R**Industrial Process Fans**

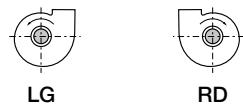

with housing and belt drive

Main Dimensions in mm, subject to change.

The dimensions can be determined from the Pre-Selection, as follows:

**P4R**

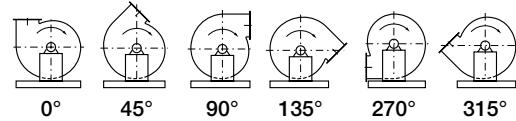

Size P4R-	Impeller $\varnothing D_2$	L_{max}	H_{max}	B_{max} for model 1	3
H	447	1200	880	980	900
J	501	1270	950	1030	960
K	562	1460	1100	1090	1000
L	631	1560	1220	1200	1100
M	708	1650	1350	1290	1170
N	794	1780	1500	1400	1270
P	891	2050	1700	1520	1370
Q	1000	2150	1900	1620	1450
R	1122	2670	2150	1650	1430
S	1258	2800	2410	1820	1560
T	1413	2950	2680	1940	1700
U	1585	3060	3000	2190	1920

Housing Position and Rotation**Direction of rotation**

The direction of rotation is determined with viewing direction toward the drive side (motor):

LG = anticlockwise.**RD** = clockwise.

LG and RD are available.

P4R**Housing positions**

The housing positions of the P4R are possible in 45° for the following positions:

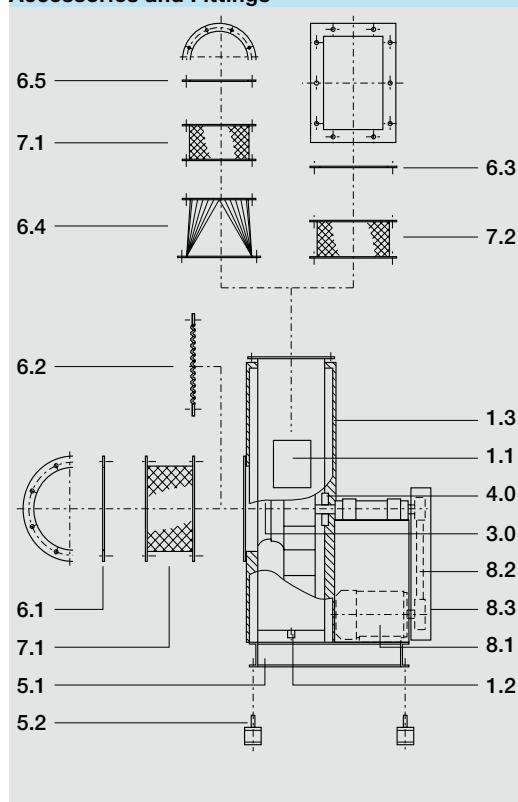

0°, 45°, 90°, 135°, 270° and 315° (see Fig.)

Housing settings 180° and 225° on request.

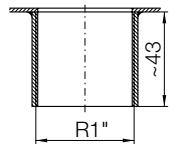

Industrial Process Fans

with housing and belt drive

Accessories and Fittings

Drain plug for P4R

Welded coupler

1.0 Housing fittings

1.1 Inspection door

also available as a sealed door.

1.2 Drain plug

Welded coupler of steel or stainless steel 1.4307, R 1" internal thread.

1.3 Acoustic insulation, thermal insulation

3.0 Explosion protection

In accordance with ATEX Category 2 or 3; gas or dust.

4.0 Sealing systems

Housing

- Housing welded watertight and sealed (standard for stainless steel material). An absolute seal cannot be achieved.

Shaft

- Stainless steel shaft seal to 300 °C (standard for stainless steel housing and fans for media temperatures >100 °C).
- Shaft seal and aerodynamic seal (impeller back side blades).
- Shaft seal and V-ring seal, to 200 °C.
- Shaft seal and V-ring seal and water deflector, to +200 °C.

5.0 Set-up systems

5.1 Base frame

Included in the standard scope of delivery.

5.2 Vibration dampers

One set of vibration dampers. Spring vibration dampers available on request.

6.0 Connection element, rigid

6.1 Mating flange

suction-side in accordance with DIN 24154-R4.

6.2 Protective intake grille

chrome-plated.

6.3 Mating flange

pressure-side in accordance with DIN 24158-R4.

6.4 Transition piece

rectangular to round DIN 24154, R4 welded-on.

6.5 Mating flange

for transition piece in accordance with DIN 24154-R4.

6.6 Screws / seals

1 set for connection of a connecting element / flexible connection.

7.0 Connecting element, flexible

7.1 Flexible connection

round, suction-side or for the pressure-side transition piece.

7.2 Flexible connection

rectangular, pressure side, also watertight.

7.3 Baffle

round and rectangular, internal

Protects sleeve if there is negative pressure and protects against particles

8.0 Drives

8.1 Motor

PTC thermistor temperature sensor, other numbers of contacts, protection classes, thermal classes, voltages, frequencies, EEx e.

8.2 Belt drive

8.3 Belt guard

8.4 Thermal barrier

On the shaft passage for media temperatures over +100 °C

Q2M

Industrial Process Fans

without housing, with direct drive

How to quickly get the desired result.

For example:

~50.000 m³/h and ~2.800 Pa.

In the Pre-Selection you will find:

Type designation: Q2M-R2B4Y

Dimensions see page 16

Motor power in kW

Motor poles

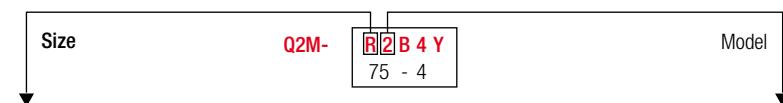

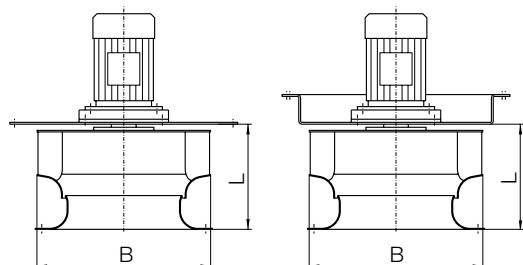

Q2M

Industrial Process Fans

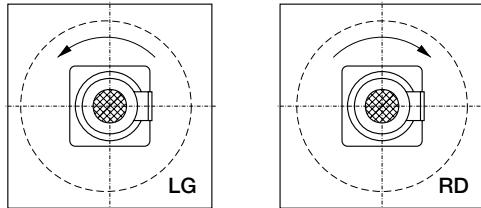

without housing, with direct drive

Main Dimensions in mm, subject to change.

The dimensions can be determined from the Pre-Selection, as follows:

**Q2M**

Size: Q2M-	Impeller \varnothing B	L_{\max} for model 1	2	3	5
D	282	180	—	140	—
E	316	—	180	—	—
F	355	210	200	180	130
G	398	250	210	200	150
H	447	270	250	210	160
J	501	290	270	250	180
K	562	310	290	270	190
L	631	390	310	290	230
M	708	430	390	310	240
N	794	480	430	380	—
P	891	540	480	430	—
Q	1000	600	540	480	—
R	1122	670	600	540	—
S	1258	750	670	600	—
T	1413	—	—	670	—

Rotation

The direction of rotation is determined with viewing direction toward the drive side (motor):

LG = anticlockwise.

RD = clockwise.

LG and RD are available.

Kit System

Mounting plate Mounting frame	Possible Versions for -20 °C to t_{\max}	heat loss over the mounting plate app. (uninsulated $\Delta 100\%$)
Mounting plate level/round level/square Motor, B5 mounting (to motor size 180)	+300 °C	100 %
Mounting frame Series 100 mm install depth ① Motor mounting B5 (to motor size 180) Motor mounting B3 (from motor size 200)	+300 °C	100 %
Mounting frame Series 100 mm install depth ① thermolock50 insulation, Motor mounting B5 (to motor size 180) Motor mounting B3 (from motor size 200)	+500 °C ②	30 % through thermolock50

Thermal barrier for all versions for continuous temperatures over +100 °C series

① „Custom install depth“ possible

② From +400 °C impeller is always stainless steel 1.4307

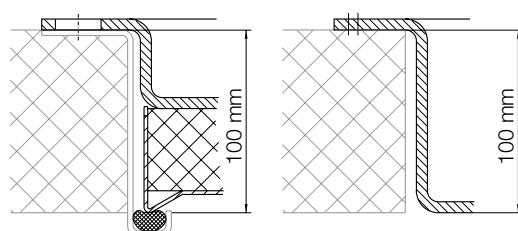

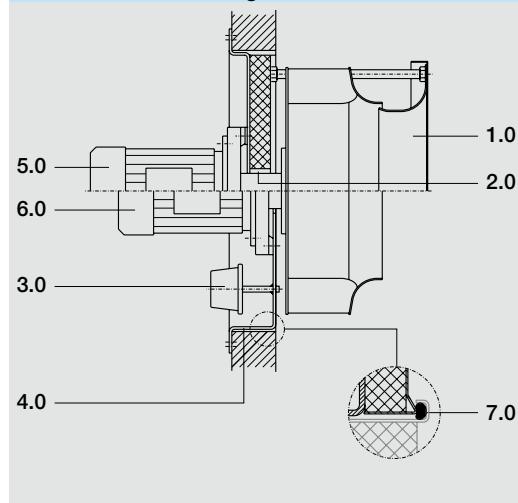

The specification is on page 5
See pages 14 and 15 for pre-selection ...

Q2M

Industrial Process Fans

without housing, with direct drive

Accessories and Fittings

1.0 Inlet cone

Standard, loose

Attached inlet cone

For easy installation and optimal functional safety.

Not available for round, level mounting plate.

2.0 Shaft seal

- Stainless steel shaft seal to +500 °C
(Standard if parts that contact the medium are stainless steel,
- For media temperatures greater than +100 °C and for *thermolock50*).
- Shaft seal and aerodynamic seal (impeller back side blades).
- Shaft seal and V-ring seal, to 200 °C.
- Shaft seal and V-ring seal and water deflector, to +200 °C.

3.0 Function monitoring

Through attached pressure cell with change-over contact.

Not available for round, level mounting plate.

4.0 Custom mounting frame depth

The standard install depth with mounting frame is 100 mm.

5.0 Explosion protection

Prepared for ATEX Category 3; gas or dust.

6.0 Drives

Motor

PTC thermistor temperature sensor, other numbers of contacts, protection classes, heat classes, voltages, frequencies, EEx e.

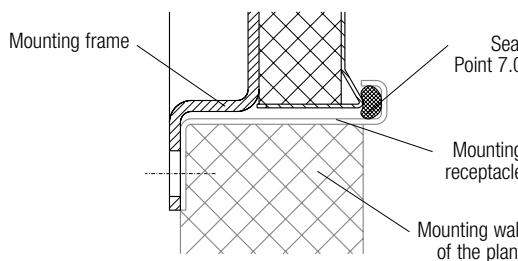

Thermal barrier

on the shaft passage, at media temperatures in excess of +100 °C

7.0 Ceramic fibre seal

For interior seal *thermolock50* strictly required.

thermolock50

The highly efficient thermal insulation from Nicotra Gebhardt: *thermolock50*

Up to this point the usual solution consists of a thick insulation, most frequently with rock wool. However fans insulated in this manner are complex in design, and thus expensive. Now we know that they also frequently retain a lot less heat than was formerly assumed.

Through an extensive series of tests we have learned the following: It is not thickness of the insulation material alone that determines how good the thermal insulation of a fan is, the number and type of thermal bridges is also an important factor.

With *thermolock50* we have systematically minimised the thermal bridges on the basis of this knowledge.

The result

Example: Fan frame size K, +300 °C continuous temperature of the medium, +20 °C ambient temperature; thermal losses only 1 kW/h, measured and confirmed.

Thus this insulation is better than conventional insulation of 100 mm and more rock wool.

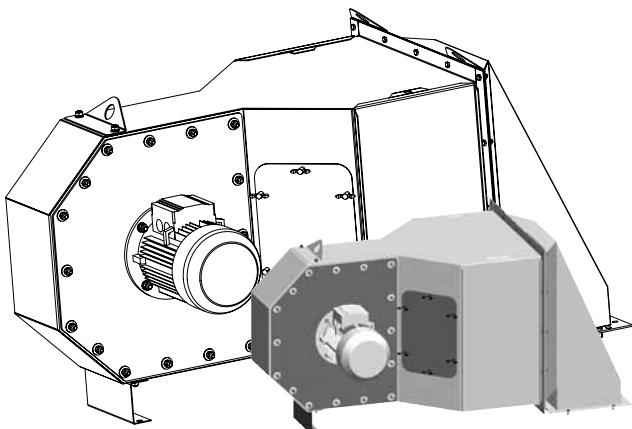

Additional advantages:

- Fewer thermal bridges due to ceramic fibre-seal (always use!).
- Hot gases do not migrate into the area between the mounting receptacle and the mounting frame. Consequence: Even less energy loss, even better contact protection.
- If the dew point is underranged sooting of the insulation material cannot occur, the insulating effect remains permanently intact.
- Particles of insulating material do not get into the medium.

Customer-specific process air fans

What we offer you

In addition to the broad line of standardised centrifugal fans for ventilation and air-conditioning technology and process air technology, and the many variants that can be generated with the product line, Nicotra Gebhardt also has years of experience in the area of customer-specific fan solutions. If the requirement is appropriate even totally new developments are possible.

Our specialists for customer-specific process air fans support your project: Competently, and they are fast and flexible.

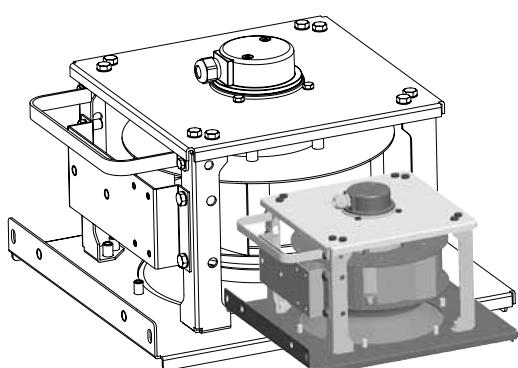

Scope of service:

- ▶ Competent consulting
- ▶ Reviewing the specification for your fan:
 - Is the target price feasible?
 - Is the desired delivery date feasible?
 - Can the technical requirements be implemented?
 - Is a customer-specific solution economically practical?
- After the customer approves the project
 - ▶ Complete development of the fan
 - ▶ Building the sample and measuring it on standard test stands
 - ▶ Supporting the customer with the practical test in the plant
 - ▶ Optimisation of the fan based on the results of the practical test

After the customer approves the sample

- ▶ Set-up of manufacturing at Nicotra Gebhardt
- ▶ Optimisation of the logistics chain to the customer

Many successful projects for our customers in different industries speak for themselves.

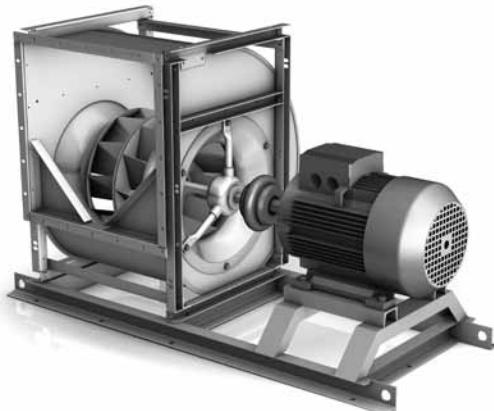

Each industry imposes its own requirements on ventilation and air-conditioning technology. We have employees who are specialised in specific industries. For example ...

- ▶ Wind turbines
- ▶ Systems for environmental engineering
- ▶ Machines for the food products industry
- ▶ Rail vehicles
- ▶ Plastic machines

Our industrial competence

Fans for comfort applications, also for process airtechnology.

Also in the field of process air technology there are applications for which our ventilation and air-conditioning technology fans are ideally suitable.

Choose the fan that is right for your application from a large standardised product line - with the aid of our electronic selection program proSELECTA II - fast and easy.
